17mm Decking Board

Mextru's decking board comes in 3 colours as standard

Mextru's low profile 17mm decking board is fully fire rated and has been independently tested. Mextru's 17mm decking board is constructed from aluminium and has several unique features, including the best non-slip surface on the market.

The 17mm decking board, as with all Mextru decking boards, has been designed to be easy to install, virtually maintenance free and designed to last up to 40 years.

All Mextru's decking boards are designed to work in harmony with the Mextru Base system. The design of the base system simplifies the decking installation process, making installs quick and easy.

The decking boards are all secured with Mextru's patented clip system which allows for board expansion whilst giving an incredibly secure fit and maintaining a drainage gap between the boards.

The system is amazingly environmentally friendly, as it is manufactured from recycled aluminium and is fully recyclable at end of life.

17mm Decking Board

Technical Data

Weight	9.74kg/m ² (Boards only)	
Material	Aluminium 6063 T6	EN755/9
Slip resistance (Dry)	65	BS 7976-2
Slip resistance (Wet)	50	BS 7976-2
Shod ramp performance	29.7°—R12 (Safe)	DIN 51130
Fire classification	A2 _{FL} -s1	EN 13501-1

Loading deflection (kN / m²)

The deflection chart indicates the amount a decking board will deflect, between joists, when subject to a distributed load. Point loads will cause greater localized deflection of the boards.

Mextru recommends installing this 17mm low profile board on 600mm centers.
